
[To reject REDD+ and extractive industries to confront capitalism and defend life and territories](#)

Due to the UN climate negotiations -COP20- and the Peoples' Summit on Climate Change, held in Lima, Peru, in December 2014, over 100 organizations and social movements made a **Call to Action to strongly and collectively reject REDD+ and the 'environmental services'** - towards the COP21 in Paris, France, in December 2015.

With this Call we want to make clear that these mechanisms are a **central part of our struggle against capitalism and extractive industries and for the defense of territories and life.**

Therefore, we ask your organization, group, network or movement to join the call and support communities in resistance who warn us of the dangers of these mechanisms. The call is available in: [English](#), [Spanish](#), [Portuguese](#) and [French](#).

To support the call, we ask to send an email to [NoREDDCop20@wrm.org.uy] with the name of your group, the country or region of your work and your contact.

In solidarity,
WRM team
