
[Climate-related WRM Bulletin articles](#)

In previous issues of the WRM bulletin we have included a number of analytical and informative articles related to climate change.

WRM Declarations

The WRM has produced two declarations directly focused on the Convention on Climate Change's negotiation process. The first one was disseminated at the fourth meeting of the Conference of the Parties (Buenos Aires, November 1998).

The second declaration, focused on the issue of carbon sink plantations, was issued in May 2000 .

The Carbon Shop: planting new problems

As part of its Plantations Campaign, the WRM produced a campaign briefing on the issue of carbon sink plantations, with the aim of disseminating analysis on a relatively new and increasingly corporate-sponsored issue such as this.

The briefing is also available in French and Portuguese.
