
["Pulping the South" published in Spanish](#)

The Mexican Action Network against Free Trade (RMALC) has just published the Spanish edition of "Pulping the South: Industrial Tree Plantations and the Global Paper Economy", under the title "El papel del Sur: plantaciones forestales en la estrategia papelera internacional". We are working out with RMALC the details of its distribution and purchase mechanisms and we will let you know about how to obtain copies as soon as we sort it out. We wish to warmly thank Alejandro Villamar from RMALC for all his hard work to get the book published in Mexico.
