
[Documentary: NO to REDD and Carbon Markets](#)

?

Made in 2024 on the initiative of indigenous communities in the Amazon, Latin America, the documentary brings together experiences, reflections and testimonies of Indigenous Peoples and traditional communities who decided to say NO to REDD and other carbon projects, which they identify as a threat to their territories and cultures.

It also questions the capitalist, racist and colonial logic of these projects, which seeks to use forests historically conserved by communities to launder the image of polluting companies and generate profits.
