

APÉNDICE

Proyectos de forestación y reforestación para compensación de carbono listados por país

- La tabla siguiente resume la información obtenida de los siguientes registros de estándares privados de carbono:
 - ACR (American Carbon Registry)
 - Biocarbon
 - CAR (Climate Action Reserve)
 - Cercarbono (Ecorregistro de Cercarbono)
 - GOLD (Estándar GOLD)
 - Plan Vivo
 - Carbono social
 - VCS (Voluntary Carbon Standard – Verra)
- La información fue recuperada de la [Base de Datos de Compensaciones del Registro Voluntario](#) (VCS, GOLD, CAR, ACR) y de los registros en línea de BioCarbon, Ecoregistry Cercarbono, Social Carbon y Plan Vivo el 6 de febrero de 2024.
- La información que presentan los diferentes estándares de carbono en sus registros no tiene un patrón estandarizado, particularmente en relación con la terminología utilizada para designar a las entidades involucradas en determinado proyecto. La mayoría de los conjuntos de datos consultados informan al “desarrollador” de los proyectos, pero algunos presentan más bien, o además, al “titular”, “proponente”, “propietario” u “operador” del proyecto. Además, en varios casos, la información relativa a las empresas o entidades involucradas en el proyecto se muestra como “Múltiples proponentes”. Sin embargo, al consultar las páginas y los documentos del proyecto de forma individual, las funciones de cada entidad en un proyecto determinado se vuelven más claras.
